DETAILED ACTION

1. Claims 13-30 are pending. Claims 13-15 have been amended in this communication filed 11/05/09 entered as Response After Non-Final Action and the Supplemental Amendment filed 1/28/10 to correct the title of the invention.
2. The claim Objection to claim 14 has been overcome by Applicants' amendment to claim 14 and is hereby withdrawn.
3. The 35 USC 112, Second Paragraph Rejections for claims 13, 14, and 15 have been overcome by Applicants' amendment to the claims and are hereby withdrawn.

Allowable Subject Matter

Claims 13-30 are allowed and renumbered 1-18.

The following is an examiner's statement of reasons for allowance: The closest prior art (US 5,949,988) Feisullin discloses a method for creating, formatting or editing a database and accepting a raster image representing a physical environment. Feisullin did not disclose notifying a user of the results of the verification of the sufficiency and using the resulting verified set of data to generate at least one formatted drawing or a set of formatted data including one or more objects for use in and being transportable to a communications engineering or network management application.

Biddiscombe, J., Nix, A., Murphy, S., and Lister, D.; "The technical working party on mobile and terrestrial propagation format for a 3D geographical dataset" disclosed building 3D radio planning tools and a high-resolution database. Biddiscombe, J., Nix, A., Murphy, S., and Lister, D.; "The technical working party on mobile and terrestrial propagation format for a 3D geographical dataset" did not disclose notifying a user of

the results of the verification of the sufficiency and using the resulting verified set of data to generate at least one formatted drawing or a set of formatted data including one or more objects for use in and being transportable to a communications engineering or network management application.

Menezes, V.M., Paula Filho, W.P., Oliveria, A.A., and Lima Filho, N.C.; "A CAD system for telecommunications engineering in a GIS environment" discloses engineering and graphical data retrieved from and extended relational database.

Menezes, V.M., Paula Filho, W.P., Oliveria, A.A., and Lima Filho, N.C.; "A CAD system for telecommunications engineering in a GIS environment" did not disclose notifying a user of the results of the verification of the sufficiency and using the resulting verified set of data to generate at least one formatted drawing or a set of formatted data including one or more objects for use in and being transportable to a communications engineering or network management application.

Goodhead, H.D.; "The application of radio propagation prediction to spectrum management and radio network design in developing countries" discloses an online digital terrain database combined with accurate prediction models available in an integrated environment. Goodhead, H.D.; "The application of radio propagation prediction to spectrum management and radio network design in developing countries" did not disclose notifying a user of the results of the verification of the sufficiency and using the resulting verified set of data to generate at least one formatted drawing or a set of formatted data including one or more objects for use in and being transportable to a communications engineering or network management application.

Other Relevant Prior Art

Manfred Lebherz, Werner Wiesbeck, and Wolfgang Krank; "A Versatil Wave Propagation Model for the VHF/UHF Range Considering Three Dimensional Terrain".

Yiu F. Ko, Warren R. Jones, Rupert C. Lloyd, and Robert W.A. Dobson; "A Comparison of 3D Computer Propagation Prediction with GSM Signal Measurements".

Hoffman et al. (US 6,446,030) and Douglas et al (US 5,668,736).

An extensive search was performed and no better prior art was found.

Other Relevant Prior Art

Bator et al. (US 6,575,362); Barzilai et al. (US 6,012,045); and Cotton et al. (US 6,076,074).

For these reasons claim 13 is deemed allowable over the prior art of record and claims 14-30 are allowed by dependency.

It appears that the instant invention is beyond the skill of one of ordinary art. Accordingly the invention would NOT have been obvious because one of ordinary skill could not have been expected to achieve it. NOR would they have been able to predict the results, and as such, they would have not capability of expecting success.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
